Summary

Senior Software Engineer with deep front-end expertise and a proven track record of technical leadership in enterprise software. At Wrike, I lead complex technical initiatives, mentor engineers, and shape architectural decisions for large-scale applications.

Core stack: TypeScript, JavaScript, React, Angular, Redux, Node.js, and Webpack. Having evolved from a QA Automation Engineer into a Staff role, I bring a quality-first mindset — designing robust, scalable systems while holding a high bar for code quality and reliability.

M.Sc. in Applied Mathematics and Computer Science, Saint Petersburg State Electrotechnical University "LETI".

Education

Saint Petersburg State Electrotechnical University "LETI" — Master's degree

Applied Mathematics and Computer Science — 2016 – 2018

Saint Petersburg State Electrotechnical University "LETI" — Bachelor's degree

Applied Mathematics and Computer Science — 2012 – 2016

Experience

Wrike — Prague

Staff Software Engineer — July 2022 – Present

Technical Leadership: Guiding engineering teams on architecture, design, and best practices.

Mentorship: Coaching and supporting junior and mid-level engineers, helping them grow technically and professionally.

Project Ownership: Re-architected the **data-grid** to render **100k**+ rows, cutting render time by **70%** (10s → 3s) and eliminating recurring performance incidents.

Collaboration: Working closely with product managers, designers, QA, and other stakeholders to define requirements and deliver solutions that align with business goals.

Innovation: Researching and implementing new technologies or methodologies to improve the product and development process.

Problem Solving: Addressing and resolving critical issues, both in production and during development.

Citrix — Prague

Staff Software Engineer — July 2021 – July 2022

Developing architecture for high-load services, rewriting slow parts of the product to the new architecture.

https://citrix.com/

Wrike — Saint Petersburg, Russian Federation

Frontend Developer — September 2018 – June 2021

Working in development group which created key product solutions including Wrike Resource, Wrike for Professional

Services & Automation Engine. Most experience at Reporting, Table View, Budgeting, Time tracking, Request forms, Automation etc.

Wrike Saint Petersburg, Russian Federation

Senior QA Automation Engineer June 2016 – September 2018

Participated in the development of the main test framework in the company, the main task of which is to quickly write autotests. Main technologies: Junit, TestNg, Selenium, Retrofit, Allure, Code generation, Dependency injection.

Motorola Solutions Saint Petersburg, Russian Federation

QA Automation Engineer February 2014 – June 2016

Performed manual testing, wrote automated tests + automation tools in java and perl. Parsing test scenarios from txt, xml and google sheets and uploading reports to google sheets. Worked mainly with smartphones with selemium and appium.

Skills

Frontend

TypeScript, JavaScript, React, Angular, HTML5, CSS, Redux / Redux Toolkit, RxJS, React Query, SCSS/Sass, Next.js, Storybook, Web Performance, Lighthouse, Accessibility

Build & Tooling

Webpack, Vite, Babel, ESLint, Prettier, npm / pnpm, Module Federation, Micro-frontends

Testing & QA

Unit Testing, React Testing Library, Jest, Playwright, Vitest, Selenium WebDriver, TestNG, JUnit, Test Automation

Runtime & API

REST API, Node.js, Microservices, GraphQL

Artificial intelligence (AI)

LLM API integration, Prompt engineering, MCP (Model Context Protocol), AI-assisted development (Claude Code / Cursor / Gemini / Codex), Claude Agent Skills

DevOps & CI/CD

Git, GitLab, Docker, TeamCity, GitHub Actions, GitLab CI

Monitoring & Observability

Grafana, Graylog, Sentry

Mobile

React Native, Dart

Methodologies

Scrum, Agile

Certifications

Claude Code 101 July 2026

Anthropic Education

Building with the Claude API July 2026

Anthropic Education
